I'm a generalist who created his first website at 13 and kept at it ever since. I'm a doer who ships through iteration, not perfection. Innate curiosity about the world and ordinary observations fuel my design ideas. Sitting at the crossroads of design, engineering, and business, I grasp problems better than most, spot issues early, and build solutions with people's needs at heart. I thrive in fast-paced, collaborative teams where autonomy and rapid iteration let me deliver intuitive, high-impact mobile experiences at scale.

Work experience

Founder/CPO @ NerdCow (B2B Web Agency)

2015 - Present

- ✓ Led user-centred web/app interface design for SaaS clients, running workshops, user research, and moderated/unmoderated tests (including Google Design Sprints) to find real solutions.
- ✓ Built and maintained design systems, style guides, and component libraries for consistent, scalable experiences across projects.
- ✓ Collaborated closely with developers to implement pixel-perfect designs, bridge design/code gaps (React/TypeScript, NodeJS), and manage CI/CD workflows.
- ✓ Mentored junior designers and team members in a small agile team of 5 – including hiring engineers and people myself, giving me direct insight into talent scouting and onboarding.
- ✓ Delivered progress updates and client communication in writing (Basecamp-style) while launching multiple web apps end-to-end.

Full Stack Developer @ BeSeen (Marketing Agency)

2013 - 2015

- ✓ Assessed design feasibility, flagged issues early, and estimated efforts to align expectations.
- ✓ Delivered responsive front-end and back-end integrations focused on clean user experiences.
- ✓ Maintained web apps and sites - including paying off tech debt and optimising performance.

Education

Bachelor of Science in Web Development

2010 - 2013

Buckinghamshire New University, London, United Kingdom

Languages

Polish
Native

English
Fluent/Business

Japanese
N4/N3 (Learning)

Skills highlights

- ✓ Mobile/web UI/UX design (Figma, prototypes, user flows)
- ✓ Frontend: ReactJS/TypeScript, HTML/CSS/JS
- ✓ User research & testing (quantitative/qualitative, moderated/unmoderated, Design Sprints)
- ✓ Agile workflows, rapid iteration, and product improvement cycles
- ✓ Strong engineering collaboration and full product release experience
